Firmware Update for Elinchrom Flash units

Information

The latest EL-Skyport firmware updater or software is available as a download from our website: Elinchrom Support (search for "Software").

Install the Elinchrom software and run the application.

The Application will check automatically (Internet connection is needed) if an update for the selected / connected unit is available!

How to get the firmware revision of your Elinchrom Unit

Switch on your Elinchrom flash unit and the display shows shortly, whilst starting up the actual Firmware revision (i.e." **r.2**").

Elinchrom Firmware Update (via EL-Skyport Software 3.2)

1. Switch your Elinchrom unit ON (check correct frequency channel on your unit or module and the EL-Skyport Software)
2. Connect the correct EL-Skyport USB module to your computer, start the Updater (EL-Skyport Software)
3. Select the unit you want to update in the EL-Skyport software navigator window
4. Select **EXTRAS - Update Firmware** of the menu (only active if the unit can be updated)
5. Now the unit must be switched manually to the **"Update- Mode" => check table!**
6. In the EL-Skyport software press "Retry" to detect the unit again.
7. The Firmware Update window is displayed
8. Then select **"Update Firmware"**, select the new Elinchrom Firmware file and start the update
9. Follow the instructions and wait until the update process is finished.

ATTENTION:

- **Do not interrupt the Firmware update process!**
- **Ensure that the battery charger is connected correctly for battery supplied flash units whilst the Firmware update is in process!**

Your Elinchrom Team
